

Layered Projection Brand System

One model. Many lenses.

Layered Projection

A stable model projected through multiple semantic lenses.

- Central object = system truth
- Layered planes = lenses
- Blue ray = selected projection / effect
- Blue dot = resolved destination / focus

AVGL Iconography

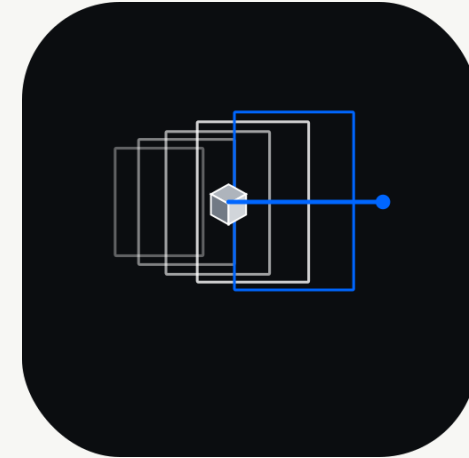

Product and communication system

Main

One model. Many lenses.

AVGL · AGENT VISUAL GRAMMAR LANGUAGE

Use layered planes to communicate projection, never decoration.

Keep the central object stable across lens transitions.

Preserve monochrome readability; blue is supporting semantics.
